Empowering Public Administration & Businesses Since 2020

WHO WE ARE

Executive Overview

Econet Org is a technology enterprise established in 2020 in Jammu & Kashmir, specializing in secure, high-uptime digital platforms, public administration workflows, enterprise web applications, and secure digital identity services across India. We bridge the critical gap between advanced software engineering and institutional trust by delivering audit-ready, compliance-first digital infrastructure.

Operating across government, non-profit, and corporate sectors, Econet powers mission-critical portals with automated verification, role-based controls, TRAI-compliant SMS gateways, and secure digital signature integrations (DSC Class-3 & GeM).

Registered Headquarters	Guda Sathu, Budgam, Jammu & Kashmir – 191111, India
Year Established	2020

VISION & MISSION

Strategic Purpose

Our Vision

To serve as India's benchmark digital infrastructure provider, enabling public departments, enterprises, and citizens to interact seamlessly through secure, verifiable, and resilient systems.

Our Mission

To eliminate technological friction by designing secure-by-default software, accelerating paperless e-governance, and upholding the highest standards of data integrity and regional accountability.

TECHNICAL DOMAINS

Core Capabilities & Specialized Domains

Digital Identity & Public Verification
QR-based real-time credential validation, tamper-evident digital certificates, automated verification portals, and secure certificate registries.

Public Sector & Institutional Portals
Custom workflow engines for block-level and district administration, citizen service desks, and compliance-driven e-governance systems.

Enterprise Software & Web Portals
Scalable web applications built on modern frameworks (Laravel, Vue.js, Node.js), role-based permissions, automated invoicing, and analytics.

Statutory Compliance & DSC Workflows
End-to-end integration with Class-3 Digital Signature Certificates (DSC), e-Tendering, GeM procurement readiness, and e-sign workflows.

Cloud Infrastructure & High-Uptime Hosting
Managed cloud deployment (Linux VPS, Nginx, Docker), automated database replication, CDN asset caching, and 99.98% guaranteed SLA uptime.

Cybersecurity & DPDP Compliance
Multi-factor authentication (MFA/OTP), AES-256 data encryption at rest and in transit, continuous security auditing, and DPDP 2023 compliance.

PROVEN DEPLOYMENTS

Key Institutional Engagements

BDO Budgam Official Portal
Block Development Office digital administration gateway delivering rural development tracking, citizen notices, and administrative workflow automation.

Save Youth Save Future (SYSF)
Statewide non-profit platform facilitating youth empowerment programs, volunteer registrations, and institutional reporting with verification systems.

Common Cause Trust (CCTSGR)
Institutional management, public donations, trust accounting, and governance reporting portal with encrypted record keeping.

Core Enterprise Firewall & Licensing Suite
Internal network monitoring, IP threat mitigation, and automated software license generation with cryptographically signed tokens.

WHAT GUIDES OUR DELIVERY

Core Principles & Ethics

- **Institutional Trust:** Zero-compromise security architecture engineered for government and public scrutiny.
- **Open Transparency:** Unambiguous scope definitions, transparent pricing, and direct communication without intermediary layers.
- **Continuous Reliability:** Redundant cloud backups, proactive server monitoring, and guaranteed response SLAs.
- **Engineering Precision:** Strict adhering to modern PHP 8.x, clean RESTful standards, and semantic code quality.

WHAT WE DELIVER

Service Offerings & Solutions Suite

Full-Stack Web Development
Turnkey bespoke web portals, responsive corporate sites, and high-performance applications built on Laravel and modern frontends.

Digital E-Commerce & Licensing
Online transactional stores with Razorpay, PayU, and cashfree gateways, automated PDF receipts, and instant license provisioning.

Government & GeM Solutions
Vendor registration support, GeM portal integration, technical bids preparation, and institutional digital asset hosting.

Automated Notification Services
TRAI DLT compliant bulk SMS routing (MSG91/Airtel), transactional notifications, order alerts, and multi-factor authentication.

MODERN TECHNOLOGY STACK

Engineered for High Performance

Backend Frameworks
PHP 8.2+, Laravel 11, Node.js, Python, Composer

Frontend Architecture
Vue.js, Alpine.js, Tailwind CSS, Blade, Vite

Databases & Caching
MySQL 8, PostgreSQL, Redis, In-Memory Queues

Cloud & DevOps
Linux (Ubuntu), Nginx, Git, SSL/TLS, Docker, Cloudflare CDN

EXECUTIVE COMMITMENT

Leadership & Vision

Riyaz Ahmad Bhat
Founder & CEO

Riyaz Ahmad Bhat
Founder & Chief Executive Officer

“At Econet Org, our mission has been unswerving — to engineer digital tools that institutions, enterprises, and citizens can rely upon with absolute confidence. From district-level public administration to corporate digital stores, we place security, transparency, and accountability at the bedrock of every line of code we write.”

Riyaz directs the technology strategy and regulatory compliance operations at Econet Org, partnering with regional public bodies and expanding digital opportunities across the Kashmir Valley and national markets.

REGULATORY COMPLIANCE

Certifications & Accreditations

ISO 9001:2015 Standards
Structured software development lifecycle, continuous quality management, and rigorous release benchmarks.

MSME / Udyam Certified
Officially registered with the Ministry of Micro, Small and Medium Enterprises (UDYAM-JK-04-0036781).

GST Registered Firm
Full tax compliance under GSTIN 01FCEPB8715C1Z9 with standardized B2B invoicing and digital e-way bills.

GeM & DLT Registered
Approved vendor on Government e-Marketplace and registered on Airtel/Jio DLT portals for official SMS dispatch.

OUR DIFFERENTIATORS

Why Organizations Partner With Econet

Direct Stakeholder Accountability
Eliminate layers of outsourcing. You collaborate directly with experienced software engineers and architects.

Security & DPDP 2023 Readiness
Built-in data privacy compliance, encryption of personal identifiable data, and adherence to Indian cyber laws.

Rapid Prototyping & Agile Sprints
Accelerated time-to-market with production-grade prototypes deployed in weeks rather than months.

Dedicated 24/7 Support Desk
Continuous monitoring, proactive security updates, daily automated off-site backups, and emergency patch response.
